

XYZprinting da Vinci miniMaker Play, Make & Learn

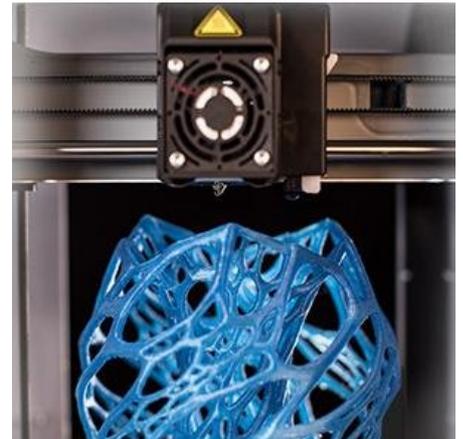

Ready to Print

The miniMaker can print right out of the box. Prints with XYZprinting filaments only, so there is no need to adjust material setting. With the FREE starter filament and the auto-calibration function, you can start your first print right away.

Hassle free software

All XYZprinting printers come with FREE CAD and slicing software. The user-friendly UI design will lead you all the way from modeling to printing.

Print SAFELY

The PLA filament our printer uses is derived from natural materials, and has gone through various tests to ensure that it is DEHP-free and Heavy Metal-free, giving you peace-of-mind to leave the printer printing quietly in the corner.

What else do we offer

XYZprinting STEAM

Based off NGSS principles, XYZprinting provides over 30 ready-to-teach lessons online, which can encourage collaborative learning and problem-solving skills of your child or student.

Online gallery

We gathered passionate and creative designers, sharing 3000+ 3D models available for free download. Join the community and create together!

Tech support

Besides online tickets, you can also reach our tech support via Skype or telephone. Visit our website to learn more.
