XYZprinting 3D Pen

Bring your imagination to life and take doodles to the next dimension with XYZprinting's first 3D Pen! Perfect for hobbyists, arts & crafts and school projects, it's sure to excite and add an extra level of creative flair to any design.

Become the Maker

You don't need to be an expert in 3D printing to get in on the Maker Revolution – simply feed the filament through the 3D Pen, plug it in and away you go.

The PLA thermoplastic is heated within the casing to make it more pliable, but cools quickly allowing you to draw 3D objects of any shape and any size in a matter of minutes.

Add your own personal touch

For a more practical application, the 3D Pen can equally be used to decorate and add the finishing touches to other projects and prints. Highlight finer details with different colours or personalise objects with intricate designs – the choice is yours.

For small touch ups, why not use the 3D Pen to repair damaged items?

A safe introduction for the next generation

Accepting only non-toxic PLA, and with a robust outer shell, the 3D Pen is a great way to introduce children to the wealth of creative possibilities 3D printing has to offer.

SPECIFICATIONS

Printing Spec.	Description
Technology	FFF (Fused Filament Fabrication)
Maximum Creation Size	Manual drawing
Nozzle Diameter	Replaceable: 0.8mm/1.2mm
Filament Diameter	1.75mm
Print Materia	PLA
Dimension	
Pen Dimension	7 " x 0.8 " x 0.8 " / 18 x 2 x 2 cm
Weight	0.15 lbs / 80 g
