

MX-B450W / MX-B350W

A4 Black & White MFP

www.sharp.co.uk

More performance, less effort

Imagine being able to boost your productivity with the kind of tools used in large offices. But without the same complexity or cost. Then look no further.

With output speeds of up to 45ppm (MX-B450W) or 35ppm (MX-B350W), these A4 monochrome MFPs feature a powerful print engine and enhanced features.

Connect anyhow, anywhere, securely

Want to share something from a mobile device? Now you can. Our MFPs include built-in wireless connectivity as standard. So you can unlock a whole new way of working that gets things done faster and with less wasted effort.

It gives you the flexibility to work on mobile phones and tablets, as well as desktops and laptops, and place your MFPs in the most useful locations. And, with Sharpdesk Mobile^{*1}, scanned documents can be easily saved to mobile devices, or you can print files stored on them.

Technology made simple

In every workplace people have different needs and different levels of technical ability. Things can get complicated. So why not make life simple?

With their modern design and space-efficient, modular configuration, these MFPs will suit any work environment, whether you need a desk top device or a floor-standing configuration.

They also include a range of easy-to-use features:

- a 5-line LCD control panel provides clear and concise
 information
- Scanner Program Keys store frequently used scan settings and destinations for easy, one-touch recall
- a USB port on the front means you can instantly print from or scan to a USB drive!

To save you even more time, you can control and manage all of your networked MFPs and printers centrally through the Sharp Remote Device Manager (SRDM).

Work faster

Why trade-off speed for efficiency – when you can have both? The MX-B450W and MX-B350W MFPs have a large 1,150 sheet capacity (with additional paper tray). But their standard paper tray, as well as multi bypass tray, accommodates a wide variety of paper sizes, including A6, and media up to 220gsm. So they can easily handle a variety of personal or workgroup needs, while requiring very little user intervention during the day.

And if you have busy environments, such as reception areas, where time is short then they are perfect for fast document digitisation. They offer:

- **full colour network scanning** with multiple scan destinations, such as e-mail, FTP server, network folder and desktop
- **a built-in duplex module** for making two-sided copies and printouts
- a 50-sheet RSPF (reversing single pass feeder) that can scan documents at up to 40ipm^{*2}, as well as ID and business cards^{*3}
- **an ID Card Copy function** with a dedicated key that enables easy copying of both sides of a card onto a single page.

They also include LDAP support for easy browsing of email addresses.

*1: Availability varies by country/region. *2: Images per minute; when feeding A4 (8 ½" x 11") one-sided sheets.

*3: One-sided scanning of up to 25 cards.

Keeping your data safer

As you gather more and more information, so the risk of data theft or cyber attacks increases. That's why we include robust security features that keep your documents and device secure:

- **advanced network encryption** using IPsec and SSL protocols keeps your information secure
- **standard user authentication** for up to 30 users prevents any unauthorised use
- **data initialisation** totally erases any retained data when it's time to replace the MFP.
