

Empower students to explore new worlds with complete control...

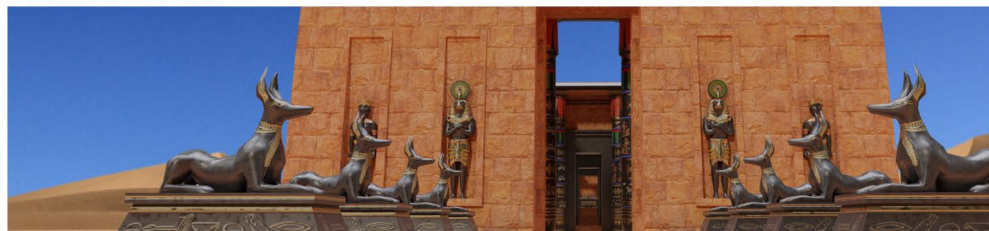

CLASSVR USB HAND CONTROLLER

Adding to the excitement of ClassVR's innovative gesture controls, ClassVR now has a wired hand controller to simplify interaction and deliver an even more immersive experience.

The USB Hand Controller can be connected to an official ClassVR headset via the supplied USB cable. Being powered solely by the ClassVR headset during use, it's lightweight and features three buttons, plus a central joystick controller.

When immersing students into a virtual learning environment with ClassVR headsets, the optional Controller empowers students to intuitively explore their virtual environment with a new found fluidity and complete control.

COMPATIBLE WITH
 SCENE CRAFT

Explorable scenes allow students to move around in VR, fully immersing them in virtual worlds and environments. Each scene has elements to explore, explain and research, and provides contextual learning in a highly immersive way.

- ✓ Compatible with ClassVR headset models: CVR-155 / CVR-155-A / CVR-255
- ✓ One controller per headset included with new ClassVR Premium Complete Kits, available in 4 and 8
