Description

COBRA PRO INFERNO MT1253

PROFESSIONAL MECHANICAL GAMING KEYBOARD

COBRA PRO INFERNO is a mechanical keyboard designed by gamers for gamers, who are searching a high value of comfort and reliability.

The keyboard is designed for computer games, but it's also a perfect device for everyday use in the office or at home.

Ergonomic design

Our mechanical keyboard has a solid aluminum case. COBRA PRO INFERNO weighs 800g. Ergonomic shape of the keyboard and well-shaped keys affect the quality of use. The keyboard has twelve function keys that makes access to multimedia, internet and audio control much easier.

At the bottom of the keyboard there are feet that allow the user to adjust the height. The MT1253 keyboard is equipped with a gold-plated USB connector. There is a ferrite filter on the cable that reduces any interferences.

CYAN AX SWITCHES

The COBRA PRO INFERNO keyboard is equipped with CYAN AX mechanical switches, which makes the response time way quicker and gives a huge advantage over other players. The actuation force is 50g.

Programmable backlight colors

The keyboard has a programmable backlight colors option, that is an additional interesting variety. Especially during battles in the night! You can adjust the brightness of the backlight

ANTI-GHOSTING TECHNOLOGY

This is a feature that prevents the keyboard from locking when you press many keys at the same time. It's possible thanks to the precise control of each key by ARM CORTEX M3 processor.
