Description

Media-Tech presents an elegant, energy-saving **WIRELESS CHARGING LAMP MT221** desk lamp with adjustable light brightness level and a built-in wireless charger for smartphones (5V 1A, 5W, Qi standard).

The **WIRELESS CHARGING LAMP** lamp has a modern and original design, which will fit into the decor of your office or room.

Wireless charging is extremely simple! Just place your smartphone on the lamp base and the charging process will start automatically.

Using an induction charger is more convenient than using a standard USB cable. An additional advantage is the protection against damage to the USB port of the smartphone. You don't have to constantly plug in and out your charging cable anymore.

Charge your phone quickly, easily and conveniently! The lamp is safe to use, resistant to voltage drops, shocks, vibrations, frequent switching on and off. Moreover adjustable arm allows you to set the lamp in any convenient position.

MT221 has 2 light colors with brightness adjustment. The light temperature range is 2700-6500K.

An additional function is a practical timer that turns off the lamp automatically after 1 or 2 hours.
