

TEST REPORT ERP for electronic displays COMMISSION REGULATION (EU) 2019/2021 COMMISSION DELEGATED REGULATION (EU) 2019/2013			
Report Reference No:	AIT22081704N		
Date of issue:	2022-08-26		
Total number of pages	25 pages		
Testing Laboratory name	Dongguan Yaxu (AiT) Technology Limited		
Address	No. 22, Jinqianling Third Street, JitiGang, Huangjiang, Dongguan, Guangdong, China		
Testing location	Same as above		
Tested by (+ signature):	Dave Long		
Approved by (+ signature):	Sandy Liang		
	Shenzhen iBoard Technology Co., Ltd.		
Address:	1001, Block A, Tanglangcheng Square (West Zone), Fuguang Community, Taoyuan Street, Nanshan District, Shenzhen, Guangdong, China		
Manufacturer's name			
Address	Same as applicant		
Factory's name	Same as applicant		
Address	Same as applicant		
Test specification:			
Standard:	COMMISSION REGULATION (EU) 2019/2021, (EU) 2021/341; COMMISSION DELEGATED REGULATION (EU) 2019/2013, (EU) 2021/340		
Test procedure:			
Conclusion:	Compliant with the above measured standards and Commission Regulation		
	the received sample(s). This test report is prepared for the customer uct described herein. It must not be duplicated or used in part without		

prior written consent from Dongguan Yaxu (AiT) Technology Limited.

### Test Object

-	
Description:	Interactive Flat Panel Display
Brand Name:	Iboard/StarBoard
Model and/or type reference:	TE-MP-65E1, TE-QS-65, TE-QS1H-65, TE-QS-65E1, TE-XP-65E1, TE-YL-65E1, TE-IT-65E1, TE-DP-65E1, TE-AP-65E1, TE-MP-65
Ratings	Input: 100-240V~, 50/60Hz, 2.5A

### Copy of marking plate(Main unit):

The artwork below may be only a draft. The use of certification marks on a product must be authorized by the respective NCBs that own these marks.

1. The above marks are the minimum requirements required by the safety standard. For the final production, the additional marks which do not give rise to misunderstanding may be added.

2. Height of CE mark at least 5mm, height of WEEE mark at least 7mm, height of other marks at least 5mm, height of letters and numerals at least 2mm.

3. According to the EU directives which have been aligned with EU NLF (new legislative framework), both of manufacturer and importer's name and address shall be affixed on the product or, where that is not possible, on its packaging or in a document accompanying the product before the product is placed on the EU market.

#### **Test case verdicts**

Test case does not apply to the test object N/A
Test item does meet the requirement P(ass)
Test item does meet the requirement F(ail)
Testing
Date of receipt of test item: 2022-08-17
Date(s) of performance of test 2022-08-17 to 2022-08-26
General remarks This test report shall not be reproduced except in full without the written approval of the testing laboratory. The test results presented in this report relate only to the item tested. "(see remark #)" refers to a remark appended to the report. "(see appended table)" refers to a table appended to the report.
Throughout this report a comma is used as the decimal separator.
General product information:

The EUT is a Interactive Flat Panel Display designed as electronic displays equipment.
 All models are exactly the same except the model names.

3. Instructions and equipment marking related to safety is applied in the language that is acceptable in the country in which the equipment is to be sold.

# 1. General Product Information

Product type	Interactive Flat Panel Display
Screen Technology	TFT-LCD
Backlight Technology	E-LED
Display resolution	3840*2160
Size ratio	16:9
Contrast Ratio	5000:1
Viewable screen (Vertical)	8.04 dm
Viewable screen (Horizontal)	14.28 dm
Viewable Screen Area	114.81 dm <sup>2</sup>
Viewable Screen Diagonal Size	65 inch=165.1 cm
Image refresh frequency rate (Hz)	60Hz
Available Interfaces	HDMI, DP, Type C, USB
Voice recognition sensor available	NO
Room presence sensor available	NO
Minimum guaranteed availability of software and firmware updates (until):	2032-08-26
Minimum guaranteed availability of spare parts (until):	2032-08-26
Minimum guaranteed product support (until):	2032-08-26
Is there ABC function ?	With 🔲 Without 🖂
Is there force menu ?	With 🔲 Without 🖂
Brightness for default	50%
Contrast for default	50%
Interface Tested	DP
Power supply type:	Internal
Adapter	1
- Average active efficiency (%)	1
- Efficiency at low load (10%) (%)	1
- No-load power consumption (W)	1
Nameplate input current for main unit	2.5A
Automatic Brightness Control	No
Automatic Brightness Control enabled	No
Volume for test	0.7W
Display panel	Maker: Shenzhen iBoard Technology Co., Ltd. Type: UV650QUB-N90

# 2. Set-up and connections used for electrical testing:

Electronic displays other than televisions, with various selectable input sources shall switch, as configured in the normal configuration, into standby mode, networked standby mode or another mode which does not exceed the applicable power demand requirements respectively for standby or networked standby mode when no input is detected by any input source for over 10 seconds and, for digital interactive whiteboards and for broadcast displays, for over 60 minutes.	P
Before triggering such a switch, a warning message shall be displayed and the switch completed within 10 minutes.	Р
D. MATERIAL EFFICIENCY REQUIREMENTS	-
From 1 March 2021, electronic displays shall meet the	Р
requirements indicated below. 1. Design for dismantling, recycling and recovery	
	N/A
Manufacturers, importers or their authorised representatives shall ensure that joining, fastening or sealing techniques do not prevent the removal, using commonly available tools, of the components indicated in point 1 of Annex VII of Directive 2012/19/EU on WEEE or in Article 11 of Directive 2006/66/EC of the European Parliament and of the Council (1) on batteries and accumulators and waste batteries and accumulators, when present.	N/A
Manufacturers, importers or their authorised representatives shall, without prejudice to point 1 of Article 15 of Directive 2012/19/EU, make available, on a free-access website, the dismantling information needed to access any of the products components referred to in point 1 of Annex VII of Directive 2012/19/EU.	N/A
This dismantling information shall include the sequence of dismantling steps, tools or technologies needed to access the targeted components.	N/A
The end of life information shall be available until at least 15 years after the placing on the market of the last unit of a product model.	N/A
2. Marking of plastic components	P
Plastic components heavier than 50 g:	Р
(a) Shall be marked by specifying the type of polymer with the appropriate standard symbols or abbreviated terms set between the punctuation marks '>' and '<' as specified in available standards. The marking shall be legible.	P
Plastic components are exempt from marking requirements in the following circumstances:	P
(i) the marking is not possible because of the shape or size;	P
(ii) the marking would impact on the performance or functionality of the plastic component; and	Р
(iii) marking is technically not possible because of the molding method.	P
For the following plastic components no marking is required:	P
(i) packaging, tape, labels and stretch wraps;	Р
(ii) wiring, cables and connectors, rubber parts and anywhere not enough appropriate surface area is available for the marking to be of a legible size;	Р
(iii) PCB assemblies, PMMA boards, optical components, electrostatic discharge components, electromagnetic interference components, speakers;	Р

(iv) transparent parts where the marking would obstruct the function of the part in question.		Р
(b) Components containing flame retardants shall additionally be marked with the abbreviated term of the polymer followed by hyphen, then the symbol 'FR' followed by the code number of the flame retardant in parentheses. The marking on the enclosure and stand components shall be clearly visible and readable.		Р
3. Cadmium logo		Р
Electronic displays with a screen panel in which concentration values of Cadmium (Cd) by weight in homogeneous materials exceed 0,01 % as defined in Directive 2011/65/EU on the restriction of the use of certain hazardous substances in electrical and electronic equipment, shall be labelled with the 'Cadmium inside' logo. The logo shall be clearly visible durable, legible and indelible. The logo shall be in the form of the following graphic:	Cadmium free	Ρ
The dimension of 'a' shall be greater than 9 mm and the typeface to be used is 'Gill Sans'. An additional 'Cadmium inside' logo shall be firmly attached internally on the display panel or molded in a position clearly visible to workers once the external back cover bearing the external logo is removed. A 'Cadmium free' logo shall be used if concentration values of Cadmium (Cd) by weight in any homogeneous material part of the display do not exceed 0,01 % as defined in Directive 2011/65/EU.		
4. Halogenated flame retardants		Р
The use of halogenated flame retardants is not allowed in the enclosure and stand of electronic displays.		Р
5. Design for repair and reuse		Р
(a) Availability of spare parts:		Р
(1) manufacturers, importers or authorised representatives of electronic displays shall make available to professional repairers at least the following spare parts: internal power supply, connectors to connect external equipment (cable, antenna, USB, DVD and Blue-Ray), capacitors, batteries and accumulators, DVD/Blue-Ray module if applicable and HD/SSD module if applicable for a minimum period of seven years after placing the last unit of the model on the market;		Ρ
(2) manufacturers, importers or authorised representatives of electronic displays shall make available to professional repairers and end-users at least the following spare parts: external power supply and remote control for a minimum period of seven years after placing the last unit of the model on the market;		Ρ
(3) manufacturers shall ensure that these spare parts can be replaced with the use of commonly available tools and without permanent damage to the appliance;		Р

(4) the list of spare parts concerned by point 1 and the procedure for ordering them shall be publicly available on the free access website of the manufacturer, importer or authorised representative, at the latest two years after the placing on the market of the first unit of a model and until the end of the period of availability of these spare parts; and (5) the list of spare parts concerned by point 2 and the procedure for ordering them and the repair instructions shall be publicly available on the manufacturer's, the importer's or authorised representative's free access website, at the moment of the placing on the market of the first unit of a model and until the end of the period of availability of these spare parts. (b) Access to repair and maintenance information       P         After a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative's inporter's or authorised representative's website shall indicate the process for professional repairers to reguiser the process to information; to accept such a request, manufacturer's, importers or authorised representative may require the professional repairer to demonstrate that: (i) the professional repairer to accompetence to repair       P
website of the manufacturer, importer or authorised         representative, at the latest two years after the placing on the         market of the first unit of a model and until the end of the period of         availability of these spare parts; and         (5) the list of spare parts concerned by point 2 and the procedure         for ordering them and the repair instructions shall be publicly         available on the manufacturer's, the importer's or authorised         representative's free access website, at the moment of the placing         on the market of the first unit of a model and until the end of the         period of availability of these spare parts.         (b) Access to repair and maintenance information         After a period of two years after the placing on the market of the         first unit of a model or of an equivalent model, and until the end of         the period mentioned under (a), the manufacturer, importer or         authorised representative shall provide access to the appliance         repair and maintenance information to professional repairers in         the following conditions:         (1) the manufacturer's, importer's or authorised representative's         website shall indicate the process for professional repairers to         register for access to information; to accept such a request,         manufacturers, importers or authorised representative may         require the professional repairer to demonstrate
market of the first unit of a model and until the end of the period of       availability of these spare parts; and         (5) the list of spare parts concerned by point 2 and the procedure       P         for ordering them and the repair instructions shall be publicly       availability of these spare parts; the importer's or authorised         representative's free access website, at the moment of the placing       on the market of the first unit of a model and until the end of the         period of availability of these spare parts.       (b) Access to repair and maintenance information       P         After a period of two years after the placing on the market of the       prime       P         After a period of two years after the placing on the market of the       first unit of a model or of an equivalent model, and until the end of       P         After a period of two years after the placing on the market of the       prime       P         (1) the manufacturer's, importer or       authorised representative shall provide access to the appliance       prepair and maintenance information to professional repairers in         (1) the manufacturer's, importer's or authorised representative's       P         website shall indicate the process for professional repairers to       pregister for access to information; to accept such a request,         manufacturers, importers or authorised representative may       require the professional repairer to demonstrate that:
availability of these spare parts; andP(5) the list of spare parts concerned by point 2 and the procedure for ordering them and the repair instructions shall be publicly available on the manufacturer's, the importer's or authorised representative's free access website, at the moment of the placing on the market of the first unit of a model and until the end of the period of availability of these spare parts.P(b) Access to repair and maintenance informationPAfter a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions:P(1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:P
for ordering them and the repair instructions shall be publicly available on the manufacturer's, the importer's or authorised representative's free access website, at the moment of the placing on the market of the first unit of a model and until the end of the period of availability of these spare parts. (b) Access to repair and maintenance information P After a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
available on the manufacturer's, the importer's or authorised         representative's free access website, at the moment of the placing         on the market of the first unit of a model and until the end of the         period of availability of these spare parts.         (b) Access to repair and maintenance information         After a period of two years after the placing on the market of the         first unit of a model or of an equivalent model, and until the end of         the period mentioned under (a), the manufacturer, importer or         authorised representative shall provide access to the appliance         repair and maintenance information to professional repairers in         the following conditions:         (1) the manufacturer's, importer's or authorised representative's         website shall indicate the process for professional repairers to         register for access to information; to accept such a request,         manufacturers, importers or authorised representative may         require the professional repairer to demonstrate that:
representative's free access website, at the moment of the placing on the market of the first unit of a model and until the end of the period of availability of these spare parts. (b) Access to repair and maintenance information P After a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
on the market of the first unit of a model and until the end of the period of availability of these spare parts.       P         (b) Access to repair and maintenance information       P         After a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions:       P         (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:       P
(b) Access to repair and maintenance informationPAfter a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions:P(1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:P
After a period of two years after the placing on the market of the first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions:       P         (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:       P
first unit of a model or of an equivalent model, and until the end of the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
the period mentioned under (a), the manufacturer, importer or authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
authorised representative shall provide access to the appliance repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
repair and maintenance information to professional repairers in the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
the following conditions: (1) the manufacturer's, importer's or authorised representative's website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
website shall indicate the process for professional repairers to register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
register for access to information; to accept such a request, manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
manufacturers, importers or authorised representative may require the professional repairer to demonstrate that:
require the professional repairer to demonstrate that:
(i) the professional repairer has the technical competence to repair
electronic displays and complies with the applicable regulations
for repairers of electrical equipment in the Member States where it operates. Reference to an official registration system as
professional repairer, where such system exists in the Member
States concerned, shall be accepted as proof of compliance with
this point;
(ii) the professional repairer is covered by insurance covering
liabilities resulting from its activity, regardless of whether this is required by the Member State;
(2) the manufacturers, importers or authorised representatives
shall accept or refuse the registration within 5 working days from
the date of request by the professional repairer;
(3) manufacturers, importers or authorised representatives may charge reasonable and proportionate fees for access to the repair
and maintenance information or for receiving regular updates. A
fee is reasonable if it does not discourage access by failing to take
into account the extent to which the professional repairer uses the
information.
Once registered, a professional repairer shall have access to the P requested repair and maintenance information within one working
day after requesting it. The available repair and maintenance
information shall include:
- the unequivocal appliance identification; P
- a disassembly map or exploded view; P
- list of necessary repair and test equipment; P
- component and diagnosis information (such as minimum and
maximum theoretical values for measurements); - wiring and connection diagrams; P
- diagnostic fault and error codes (including manufacturer-specific codes, where applicable); and

- data records of reported failure incidents stored on the electronic display (where applicable).	Р
(c) Maximum delivery time of spare parts	Р
<ul> <li>(1) during the period mentioned under point 5(a)(1) and point</li> <li>5(a)(2), the manufacturer, importer or authorised representatives</li> <li>shall ensure the delivery of the spare parts for electronic displays</li> <li>within 15 working days after having received the order;</li> </ul>	Р
<ul> <li>(2) in the case of spare parts available only to professional repairers, this availability may be limited to professional repairers registered in accordance with point (b).</li> </ul>	Р
E. INFORMATION AVAILABILITY REQUIREMENTS	Р
From 1 March 2021, the product manufacturer, importer or authorised representative shall make available the information set out below when placing on the market the first unit of a model or of an equivalent model.	Р
The information shall be provided free of charge to third parties dealing with professional repair and reuse of electronic displays (including third party maintenance actors, brokers and spare parts providers).	Р
1. Availability of software and firmware updates	Р
<ul> <li>(a) The latest available version of the firmware shall be made available for a minimum period of eight years after the placing on the market of the last unit of a certain product model, free of charge or at a fair, transparent and non-discriminatory cost. The latest available security update to the firmware shall be made available until at least eight years after the placing on the market of the last product of a certain product model, free of charge.</li> </ul>	Ρ
(b) Information on the minimum guaranteed availability of software and firmware updates, availability of spare parts and product support shall be indicated in the product information sheet as from Annex V of Regulation (EU) 2019/2013.	Р

Annex II Energy efficiency classes ((EU) 2019/2013)		-
B. Energy Efficiency Index (EEIIabel)		-
The Energy Efficiency Index (EEIIabel) of the electronic display	See appended table	-
shall be calculated using the following equation:		
$(P_{measured} + 1)$		-
$EEI_{label} = \frac{(1 \text{ measured } + 2)}{(3 \times [90 \times tanh(0,025 + 0,0035 \times (A - 12))])}$	$(1)) + 4 + 3 + corr_{l}$	
where:	له	
A represents the viewing surface area in dm <sup>2</sup> ;		
$P_{measured}$ is the measured power in on mode in Watts in the normal configurat	ion and set as indicated in Table 2;	
$cor\eta$ is a correction factor set as indicated in Table 3.		

-	Table 2	-			
	Measurement of P <sub>measured</sub>				
Dynamic Range level P <sub>measured</sub>					
Standard Dynamic Range (SDR): Pmeasured <sub>SDR</sub> Power demand in Watts (W) in on mode, measured when displaying standardised test sequences of moving picture from dynamic broadcast content. Where allowances are applicable according to part C of this Annex, they should be deducted from Pmeasured.					
High Dynamic Range (HDR) Pmeasured <sub>HDR</sub>	Power demand in Watts (W) in on mode, measured as for $Pmeasured_{SDR}$ but with the HDR functionality activated by metadata in the standard- ised HDR test sequences. Where allowances are applicable according to part C of this Annex, they should be deducted from $P_{measured}$ .				
_	Table 3	-			
	<i>corr<sub>i</sub></i> value				
Electronic Display type	corr <sub>l</sub> value				
Television	0,0				
Monitor	0,0				
Digital signage	Digital signage 0,00062*(lum-500)*A				
	where 'lum' is the peak white luminance, in $cd/m^2$ , of the brightest on mode configuration of the electronic display and A is the screen area in $dm^2$				
C. Allowances and adjustments for the calculation	e purpose of the EEllabel	-			
Electronic displays with automatic brig qualify for a 10 % reduction in Pmeas following requirements:		N/A			
(a) ABC is enabled in the normal conf display and persists in any other stand	dard dynamic range	N/A			
configuration available to the end use (b) the value of Pmeasured, in the nor	mal configuration, is	N/A			
measured, with ABC disabled or if AB ambient light condition of 100 lux mea					
(c) if applicable, the value of Pmeasur be equal to or greater than the on mor ABC enabled in an ambient light cond the ABC sensor;	ed with ABC disabled shall de power measured with	N/A			
(d) with ABC enabled, the measured v must decrease by 20 % or more wher measured at the ABC sensor, is reduc	the ambient light condition,	N/A			
(e) the ABC control of the display scre the following characteristics when the measured at the ABC sensor changes	en luminance meets all of ambient light condition	N/A			
- the measured screen luminance at 6		N/A			
95 % of the screen luminance measured screen luminance at 3		N/A			
80 % of the screen luminance measured screen luminance at 1	red at 100 lux;	N/A			
70 % of the screen luminance measur					

Annex IV Measurement methods and calculations ((EU) 2	.019/2013)	-
1. MEASUREMENTS OF ON MODE POWER DEMAND	See appended table	Р
Measurements of the on mode power demand shall fulfil all of the		-
following general conditions:		
(a) electronic displays shall be measured in the normal		P
configuration;		
(b) measurements shall be made at an ambient temperature of 23 °C +/- 5 °C;		Р
(c) measurements shall be made using a dynamic broadcast video signal test loops representing typical broadcast content for electronic displays in standard dynamic range (SDR). For the HDR measurement the electronic display must automatically and correctly respond to the HDR metadata in the test loop. The measurement shall be the average power consumed over 10 consecutive minutes;		P
(d) measurements shall be made after the electronic display has been in the off-mode or, if an off-mode is not available, in standby mode for a minimum of 1 hour immediately followed by a minimum of 1 hour in the on mode and shall be completed before a maximum of 3 hours in on-mode. The relevant video signal shall be displayed during the entire on mode duration. For electronic displays that are known to stabilise within 1 hour, these durations may be reduced if the resulting measurement can be shown to be within 2 % of the results that would otherwise be achieved using the durations described here;		P
(e) where ABC is available, measurements shall be made with it switched off. If ABC cannot be switched off, then the measurements shall be performed in an ambient light condition of 100 lux measured at the ABC sensor.		N/A
2. MEASUREMENTS OF PEAK WHITE LUMINANCE		Р
Measurements of the peak white luminance shall be made:		Р
(a) with a luminance meter, detecting that portion of the screen		Р
exhibiting a full (100 %) white image, which is part of a 'full screen		
test' pattern not exceeding the average picture level (APL) point		
where any power limiting or other irregularity occurs;		
(b) without disturbing the luminance meter's detection point on the		Р
electronic display whilst switching between the normal		
configuration and the brightest on mode configuration.		

Annex VI Technical documentation ((EU) 2019/2013)	-	
The technical documentation referred to in point 1(d) of Article 3	See below	Р
shall include:		
(1) identification data (general description of the model):		-
(a) trademark and model identifier;	See the label	Р
(b) supplier's name, address, registered trade name;	See the label	Р
(2) references to the harmonised standards applied, other	See page 1	Р
measurement standards and specifications used in measuring the		
technical parameters and calculations performed;		
(3) specific precautions to be taken when the model is assembled,		Р
installed and tested;		
(4) a list of all equivalent models, including model identifiers;		Р
(5) measured technical parameters of the model and calculations		Р
performed with the measured parameters as listed in Table 5;		
General	See appended table	-
ambient temperature;		-
test voltage in V and frequency in Hz;		-
total harmonic distortion of the electricity supply system;		-

For on-mode:	See appended table	-
